Interior and Exterior Detailing

In order to keep your aircraft in pristine condition, trust Global Aviation, Inc.'s detailing team to complete your interior and exterior cleaning. By regularly scheduling aircraft cleaning, you can rest assure that your cabin, cockpit, and exterior will be kept in impeccable condition.

Paint Restoration

Aimed at restoring your aircraft's appearance to like-new, paint polishing and sealants remove contaminants that have left your aircraft looking dull and chalk-like. In this multistage process, these contaminants are removed before the entire painted surface is sealed multiple times locking out future buildups and providing a hard shine you'll be able to see and feel.

Brightwork

Is the brightwork on your aircraft dull, oxidized, or full of water spots? We can polish the bare metal surfaces to a mirror finish and apply a Xzilon coating to help prevent further corrosion.

Wet Wash

Global Aviation, Inc.'s wet washing technique ensures that your aircraft exterior is completely free of residue. This service is highly recommended when the aircraft is exposed to corrosive weather or conditions. Our team ensures that your aircraft will be clean and have a spot free finish when completed.

Leather Cleaning and Conditioning

With delicate care, the entire seat is first cleaned to remove oils, dirt, and grime prior to the leather being entirely worked over multiple times with premium leather conditioner. The end result is a seat that is brighter in appearance and supple to the touch.

Boot Treatment

Our team follows a multi-step boot treatment process. First stripping the old layers of sealant and residue off completely. After the boot is cleaned, our team will then apply three layers of a fresh new sealant, maintaining the boots finish.

Carpet Cleaning

Global Aviation, Inc.'s will complete a thorough carpet cleaning process to remove high traffic marks and stains. First, we do a clean sweep to pick up any debris, then our team utilizes a pre-treatment spot cleaner to break up any stains or marks. Once set, a carpet cleaning is used multiple times to extract those stains. Finally, commercial air driers are used, resulting in a clean and stain free carpet ready for your next flight.
